# Anaesthesia Workstation

**(Brainstorming & Teardown for Future Technology)**

**28<sup>th</sup> Feb 2018**

About LEARN:

This first-of-its-kind programme of Kalam Institute of Health Technology (KIHT) would provide greater insights into the design features and technology of the product. It enlightens the participants with intricate product specific knowledge through a product teardown session by Subject Matter Experts (SMEs).

This unique initiative throws light on market opportunities, critical technologies associated with the product and current research scenario, which helps taking the medical technology to next level.

**L**IVE PRODUCT TEAR DOWN
